

# OPPAIN Sterile Eye Drops

Ketorolac Tromethamine 0.5%

## Composition:

Each ml contains Ketorolac Tromethamine USP 5 mg.

## Description:

Oppain is a sterile eye drops containing Ketorolac Tromethamine. It is a non-steroidal drug, which has analgesic and anti-inflammatory activities. It inhibits the cyclo-oxygenase enzyme which is essential for prostaglandin biosynthesis. Ocular administration of Ketorolac Tromethamine reduces prostaglandin E<sub>2</sub> levels in the aqueous humor and has no significant effect upon intraocular pressure (IOP) after ocular administration.

## Indications:

Oppain sterile eye drops is indicated in postoperative pain management. It is also indicated in ocular allergic conditions.

## Dosage and Administration:

Surgical procedures: 1-2 drops 4 times daily, starting 24 hours before surgery and continuing for 2-4 weeks.

Ocular allergy: 1-2 drops 4 times daily to be continued up to 4 weeks, or advised by physician.

## Side-Effects:

Transient burning and/or stinging on instillation and other minor symptoms of ocular irritation may occur. If any discomfort occurs, please consult with physician.

## Contraindications:

It is contraindicated in the patients with known history of hypersensitivity to Ketorolac Tromethamine or any ingredients of this drug and also in the children below 3 years of age.

## Drug Interactions:

This drug can be safely administered with systemic and ophthalmic medications such as antibiotics, sedatives, beta-blockers, carbonic anhydrase inhibitors, miotics, mydriatics, cycloplegics, local anaesthetics and corticosteroids.

## Precautions:

Only for topical ophthalmic use. It should be used carefully in the patients with bleeding tendencies and patients with a known history of peptic ulcer.

## Use in Pregnancy & Lactation:

Safety in pregnancy and lactation has yet not been established.

## Storage:

Store in a cool and dry place, away from light. Use within one month after first opening. Keep out of the reach of children.

## How supplied:

Each plastic dropper bottle containing 5 ml sterile eye drops.
